

Implementing ISO 14001:2015

Learn how to implement an effective environmental management system (EMS) that meets the requirements of ISO 14001:2015.

The first day of this 2-day course starts with an overview of the standard before looking at important considerations in planning an implementation, including context, scope and life cycle, together with ways to identify and assess environmental aspects, impacts, risks and opportunities.

Day 2 takes a closer look at the standard's requirements on topics such as roles, processes, monitoring, documentation and management reviews.

Students benefit throughout the course from a practical mix of tutorials, discussions and workshops.

By the end of the course delegates will understand the requirements and considerations for implementing ISO 14001 within their organisation.

COURSE DURATION

2 days

CPD

Equivalent to 14 hours

CERTIFICATES

All delegates will receive a certificate on completion.

Who should attend?

This course is suitable for:

- those wishing to implement and maintain an ISO 14001 environmental management system (EMS)
- environmental managers needing to understand the feasibility of implementing an ISO 14001 based EMS
- managers with responsibility for the effectiveness of an existing ISO 14001 management system
- staff needing an in-depth understanding of ISO 14001 requirements

Key topics

Topics covered on the course include:

- an overview of ISO 14001:2015, its content and structure
- sustainability, sustainable development and ISO 14001
- the need for a life cycle perspective within the EMS
- identification and assessment of environmental aspects and impacts
- examination of core requirements of ISO 14001 within a structured sequence
- the process of a gap analysis
- consideration of the design of the EMS
- exploration of a common example for implementing an ISO 14001 EMS
- responsibilities, competence and communication
- the certification process
- EMS maintenance and audit programmes

Skills gained

On completion of this Implementing ISO 14001 training course delegates will be able to:

- understand what is required for the implementation of an ISO 14001 EMS, including the process of a gap analysis, implementation phases and the maintenance of an effective EMS
- explain to internal and external audiences how an EMS can benefit an organisation's environmental performance.

Delegates will also be awarded with a certificate of completion, as evidence of their new ISO 14001 Implementation skills.

Course agenda

Our training courses are designed to optimise the learning experience for delegates both in face-to-face settings and in our Virtual Classroom.

Under the guidance of our expert tutors, attendees will follow an agenda which is briefly outlined below:

- Welcome and Introductions
- Module 1 Fundamentals of ISO 14001:2015
- Module 2 Context of the Organisation
- Workshop 1 Conduct a Context Assessment
- Module 3 Leadership
- Workshop 2 Environmental Policy Evaluation
- Module 4 Planning
- Workshop 3 Develop an aspects and impacts register
- Day 1 Review
- Module 5 Support
- Workshop 4 Develop a communication plan
- Module 6 Operational Control
- Module 7 Performance Evaluation
- Workshop 5 What makes an effective internal audit
- Module 8 Improvement
- Module 9 Certification
- Module 10 Next Steps
- Workshop 6 Your action plan
- Course Review and Evaluation

In-company training

Ideal for groups, you can receive this course exclusively for your organisation at your premises or online in our user-friendly Virtual Classroom.

Enjoy cost-effective flexibility and personalised learning with tailored messaging designed to address your unique business challenges.

[Contact us for a quote.](#)

I was nicely surprised to discover the course has enhanced my knowledge of ISO 14001 and how to apply ISO 14001 to our EMS.

British Antarctic Survey

The tutor made the training really interactive, made the content accessible for all attendees with varying ISO 14001 experience levels, was enthusiastic and explained the content clearly and in a way where learnings could be applied internally to our business.

Tata Steel UK Ltd

The tutor was clearly very knowledgeable around the environmental standard and could convey that knowledge for days. Yet, whenever someone wished to talk, the tutor always encouraged discussion.
