

Introduction to ISO 45005:2020

Gain an understanding of the requirements of ISO/PAS 45005:2020 through engaging modules and interactive workshops, on this 1-day training course.

Delegates will gain an understanding of effective action which can be undertaken to protect workers and interested parties from the risks of COVID-19, identify how to address risks relating to COVID-19 using a systematic approach and understand how an effective framework can assist a company in adapting to working within a pandemic.

ISO/PAS 45005:2020 occupational health and safety (OH&S) management standard provides general guidelines to organisations on managing the risks arising from COVID-19 within the workplace. The standard is applicable to all organisations including those who have been operating throughout the pandemic and those planning to resume operations following partial or full closure.

Professional, friendly tutor explained the principles in easy to understand manner, confidence of subject matter. Good use of syndicate groups for exercises and group work.

Network Rail

Fantastic tutor! His way of training is really good. Perfect balance of coursework and fun.

QA Limited

The tutor was very engaging and very knowledgeable in regard to the standard, also, he was able to adapt when explaining certain parts of the course to allow students to understand certain aspects.
