

Pathways to Net Zero

Learn best practice for responding to the climate crisis on this IEMA certified Pathways to Net Zero training course.

This course aims to provide clear guidance to supervisors and leaders through a strategic and operational overview of environmental sustainability as it affects their specific industry and work area.

This 2-day interactive course complements our 1-day Carbon Management training course and the two are scheduled to run together in our course calendar for those who wish to focus their sustainability training.

COURSE DURATION

2 days

CPD

Equivalent to 14 hours

COURSE PRICE

From £495 + VAT

CERTIFICATES

All delegates will receive an IEMA certificate on completion.

Who should attend?

This course is ideally suited for supervisors and managers across all sectors who wish to understand how to help their organisation to Net Zero.

While the course has no formal entry requirements it is strongly recommended that delegates are already in a practising role that will allow them to more clearly understand the areas explored during the course.

Key topics

Topics covered on the course include:

- why net zero?
- responding to net zero
- greenhouse gas accounting – a primer
- carbon neutrality
- net zero methodologies
- developing a decarbonisation plan
- net zero across the value chain
- communicating net zero

Course agenda

Over 2 days the course will be modelled on the following agenda:

- Welcome and Introductions
- Section 1 Why net zero?
- Section 2 Responding to net zero
- Section 3 Greenhouse gas accounting: a primer
- Section 4 Carbon neutrality
- Section 5 Net zero methodologies
- Section 6 Developing a decarbonisation plan
- Section 7 Net zero across the value chain
- Section 8 Communicating net zero

Skills gained

Upon completion of this course, delegates will be able to explain:

- net zero and related terms
- the urgency of the underlying climate science driving the net zero agenda
- the main international policy context for responding to the climate crisis
- the UK policy context and drivers
- risks and opportunities of net zero including on future business viability, reputation, supply chain vulnerabilities etc
- business and environmental benefits of low-carbon goods and services
- the requisite corporate governance, resourcing and accountability for delivering net zero
- how to establish a greenhouse gas inventory across all three scopes
- the main principles of greenhouse gas accounting (including using activity data and emission factors)
- what carbon neutral means and its application for organisations, products and services
- how to establish science-based targets (methodologies)
- how to establish a net zero strategy (near- and long-term targets)

In-company training

Ideal for groups, you can receive this course exclusively for your organisation at your premises or online in our user-friendly Virtual Classroom.

The course content was really good.
The reading materials provided before
the course were also excellent.

KPMG

The book to follow along the taught
course material made it really easy for
the information to be taught, reviewed
and sink in fully.

MWH Treatment Ltd

The tutor was very knowledgeable,
passionate and really good at engaging,
explaining, relating, open discussions
and making the sessions really relevant
at all times. She was also very supportive
through all the individual queries of the
group. She was super friendly and filled
the class with optimism.
